Dear Gentlemen:

Here follows particulars concerning an object seen in the sky as I was putting empty milk bottles outside my front door. It was seen in late August or early September, 1965, at about 9 P.M.

1. From the way the small lights were arranged around it, it appeared to be BEETLE SHAPED.
2. Red and white small lights all around it flickered on and off.
3. Two brilliantly lighted discs formed the face of it, placed side by side like an enormous pair of eyes. The thick rims were red, the center portion amber.
4. The light of them was STEADY.
5. No apparant SOUND.
6. Heading SOUTH; almost directly toward my house.
7. Low altitude; about where a helicopter might fly looking for forest fires. And, at the same degree of speed as a helicopter.
8. When it was above the area between the two houses across the street, it turned, and went off in the same direction from where it came.

Comment:

I do not deliberately LOOK for flying objects; it was there and I SAW IT. It has been described in the enclosed clipping, by an observer, as having two "eyes", like coins. The "eyes" that I saw were about the size of a coin's headlights. They did indeed, form the WHOLE of IT.

One of the girls, Anne Cooper, had a pair of binoculars. Through them, she made out a rim illuminated by the two red "eyes" she believes she saw. She interpreted the shape to be disc-like, like a coin, from the little she could make out.

"I saw a rim, with two red lights in it, like eyes that cast a red glow."
